Freestanding Stoves

At Heritage we thought hard about what we would offer in our cast iron room heater stoves, providing fuel efficiency while retaining compact dimensions and attractive looks.

Heritage stoves are designed to complement modern living while retaining a traditional design. With classic lines and traditional casting, Heritage Stoves have retained both an old world feel and modern contemporary look.

Selecting your Heritage Stove

Heritage Stoves are renowned for their exceptional quality, and come with a limited 5 year guarantee.

All Heritage Stoves come with an airwash system. Airwash system helps to keep the glass clean.

Selected Heritage Stoves comes with tertiary air. This creates a clearburn where excess gasses combust given cleaner burning.

External air system allow the air to come directly from outside of the building. This is required for air tight houses.

All stoves are CE marked with the relevant standards for efficiency, output and safety.

Heritage stoves marked with this symbol offers thermostat for temperature control. This feature is available with boiler stoves.
